

CARPE DATUM

Fed Data Prospector

VOLUME 1. ISSUE 31.

July 9, 2019

Welcome to Carpe Datum's **Fed Data Prospector** (Vol. 1, Issue #31). We hope everyone had a happy and safe 4th of July! Despite the Holiday last week, the Carpe Datum News & Opportunity "engine" was hard at work and quite successful in finding a good number of Opps and interesting stories:

- The U.S. Air Force's Headquarters Air Force Space Command (HQ AFSPC) Chief Data Office (CDO) Data Innovation Summit will aim to provide examples of new technology and tools that would benefit AFSPC by enhancing the Space Mission and introduce the new Enterprise Data Strategy and Roadmap detailing the next steps for AFSPC in the execution of the strategy. Specifically, on Day 2 the Air Force will focus on AFSPC's Journey from Data Strategy to Data-Driven Multi-Domain Operations

In other data news (and actually an Opportunity as well), the Intelligence Community wants to hear your cutting-edge tech pitch:

- The Office of the Director of National Intelligence recently announced plans to broaden the scope of the Intelligence Science and Technology Partnership, or In-STeP program, to address more of the critical issues facing spy agencies today. The IC is doubling down on advanced analytics tools like machine learning to more quickly sift through the mountains of data being collected around the globe.

Happy Fed Data Opportunity Hunting!

The Carpe Datum Team

Opportunities & Solicitations

Headquarters Air Force Space Command (HQ AFSPC)
Chief Data Office (CDO) Data Innovation Summit
Department of the Air Force
